PUBLICATIONS

564+  
PRESENTATIONS

### Our *services*

#### Autism Diagnostic Assessments

Focused, comprehensive, and premium tiers, delivered entirely via telehealth. Appointments typically begin within weeks.

#### Customized Intervention Programs

Behavioral intervention shaped around each family's values, language, and cultural context.

#### School Coordination & Consultation

Expert consultation for school teams, counselors, and educators, including IEP support and classroom strategies.

#### Parent & Caregiver Training

Evidence-based coaching for parents and caregivers, delivered in their home language with interpreters as needed.

#### A note on *masking*

Many high-achieving students go undiagnosed for years, not because autism is absent, but because they have learned to mask it. They often present with anxiety, perfectionism, or social exhaustion. A diagnosis can bring profound relief, self-understanding, and access to the support they need to thrive.

### Who *we see*

- Children aged 2 and up, adolescents, and adults
- All ability and presentation levels, including masking
- Families navigating cultural stigma around diagnosis
- Any country, any time zone, fully online
- English and multilingual families (interpreters available)

### Why *refer*

- Most families can begin the assessment process within weeks
- Services delivered only by experts with at least eight years of experience and a Master's degree minimum
- Methodologies grounded in 16 peer-reviewed publications
- Culturally responsive care across 50+ countries served
- Direct collaboration with school teams, counselors, and educators
